

You Flash.
Flex admins.

FlexGalleryPro
Flex cms for your Flash gallery
Open Source Project

Installation

- 1) Open uploads/PHP/config.php
 - change the database settings
 - change the absolute url of your FlexGalleryPro folder. For example, if you' ll upload the files in a new folder called myGallery so write <http://www.mydomain.com/myGallery>
 - change username and password
- 2) Upload via FTP the content of " upload " folder to your /myGallery folder of your domain web server.
- 3) Change " images " folder permissions to 777 (it must be writable).
- 4) Open Flash/main fla and Flash/org.FlepStudio/Main.as
 - Main.as, line 19, change the value of GETINFO_PHP_URL with the url of getInfo.php that you just uploaded (<http://www.mydomain.com/myGallery/PHP/getInfo.php>)
 - Launch main fla that creates the new SWF (main.swf). Don't worry it seems blank.
 - Upload main.swf to your FlexGalleryPro root folder (<http://www.mydomain.com/myGallery>)
- 5) Hit your browser to install.php file (<http://www.mydomain.com/myGallery/PHP/install.php>) and if success, remove it ! If it does not success check config.php settings.
- 6) Follow the links to watch the Flash gallery and your admin Flex panel
